

## RoHS Compliance

The Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive has been passed into law by the European Union (EU). It affects manufacturers, sellers, distributors and recyclers of electrical and electronic equipment containing lead, cadmium, mercury, hexavalent chrome, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE). After July 1, 2006 the use of these materials will be banned in new products sold in Europe.

Displaze currently ensure that any new supplier of electrical and electronic products confirm in writing that they were working towards these directives. Any new supplier unable to give Displaze these assurances will not be used as a source of supply. All existing suppliers have been requested to confirm the status of their RoHS programme.

All products, and their packaging materials, distributed by Displaze are fully RoHS-compliant. An exception to this will be certain products used in medical monitoring which are exempt from the legislation.
